

## The Stream-Flo Group of Companies

# Reconditioning & Customer Property Management

### Expert Reconditioning that Extends the Life of Your Equipment or Allows You to Purchase it at Substantial Savings

*All reconditioned equipment comes with a one-year warranty and meets/exceeds API requirements*

- In-house repair capabilities on all original equipment manufacturer (OEM) product groups, wellheads, and gate valves
- A complete range of wellheads and gate valves from 2" 2000 psi to 7 1/8" 15,000 psi
- Reconditioned equipment inventoried at all our branches
- Full machining and welding capabilities are monitored by our QA/QC department

### Let Our Customer Property Management Department Care for Your Assets

*Utilize your existing inventory while lowering your costs and carbon footprint in the process*

- Customized software that will document and trace all equipment through the receipt and repair process to storage and utilization
- All branches inventory and manage large customer assets related to wellhead and gate valve equipment
- Extensive repair and testing for high-pressure rated equipment up to 15,000 psi by our reconditioning department (reconditioned equipment comes with a one-year warranty and meets/exceeds API requirements)
- At customer's request, Stream-Flo will actively try to reduce their inventories by purchasing or putting equipment out to bid on their behalf
