

The Stream-Flo Group of Companies

Aftermarket Services

Flat Rate Frac Equipment Rental, Set Up, Service, Support, and Maintenance

Everything you need for the surface control of your frac program provided by experienced experts

- Full range of frac head configurations for plug and perf and coil tubing programs
 - Gate valves from 2 1/16" to 7 1/16"
 - Frac equipment from 2 1/16 – 5,000 psi to 7 1/16 – 15,000 psi
- Custom frac head configurations available with SFI engineering support
- All repairs and maintenance exclusively performed by trained and experienced Stream-Flo technicians
- Canadian fleet with Federal Carrier Status features 100 vehicles ranging from 3/4 ton grease units to tri drive picker trucks with 22-ton lift capacity
 - All vehicles equipped with Electronic Logging Devices (ELDs) for driver safety

Patented Frac Manifolds and Proprietary Lines Provide Greater Manoeuvrability and Adjustability

Save time and money while reducing risk to workers

- Designed and built to customer specifications
- Greatly reduces the need for cranes on-site to align manifolds
- Custom connections reduce on-site torquing and provide improved safety
- Accumulators—two station up to eight station—with multi-function capabilities and remote stands for small pad sizes
- Engineered fluid analysis programs to help size and design your manifold for optimal service and durability

- Proprietary SFL frac line system provides high pressure, high flow rate, and lower erosion for frac jobs

In-house Engineering Support

Dedicated engineers ready to respond at a moment's notice

- 24-hour support from AMS-specific engineers that can respond quickly to field issues
- Easy access to the larger Stream-Flo engineering department for design, troubleshooting, and consolidated services—all the way from drilling through to production assistance on wellhead design
- AMS engineers hold frac-related patents and are solely focused on application specific innovation and optimization

The Stream-Flo Group of Companies Aftermarket Services

Purpose-built AMS facility

Save on shipping and rig in time thanks to our 30,000 square-foot dedicated frac facility

- Save thousands of dollars getting all your frac-related equipment on-site in one single delivery
- No wasted time waiting around for equipment to show up in separate deliveries
- Stream-Flo Field Services are equipped with items and spare parts so if you ever forget something for on-site—we have you covered

Comprehensive Valve Greasing Capabilities

Keep your valves operating optimally without having to stop production

- Fully equipped greasing trucks
- Ability to pump grease or lubricant to 15,000 psi without shutting in your well
- Single wellhead or multiple pad service
- On-site valve repair
- Nitrogen testing
