

PRESS RELEASE

FOR IMMEDIATE RELEASE

EDMONTON, August 30, 2023

The Stream-Flo Group of Companies today announced its proud support of a crucial education initiative, providing detailed and factual information about the energy industry delivered free to every high school student in the province of Alberta, and beyond.

Stream-Flo Industries, Master Flo Valve, and Dycor Technologies are jointly contributing \$50,000 towards the Energy Literacy Program, developed in partnership with SWIFT Learning and the SiS (Safety in Schools) Foundation. Aligned with the Alberta Education Career and Life Management (CALM) curriculum, the Energy Literacy Program will educate youth about how things are made and used in their everyday lives, detail incredible energy industry innovations, foster pride, and raise awareness about careers in the energy sector. An Energy Hub will be created for students interested in learning more, allowing them to also connect with mentors and prospective employers.

“Educating youth about the energy industry is vitally important for all of humanity” said Mark McNeill, President and CEO of the Stream-Flo Group of Companies. “I cannot think of a more effective way to underline the importance, value, and career opportunities the energy industry provides than to ensure our youth have access to this information and to people who work in energy. I’m urging my fellow leaders in the energy community to join us in contributing to this worthy venture”.

For further information on how you or your organization can support the Energy Literacy Program, please reach out to:
